

US 36 Construction Project Completed Ahead of Schedule

June 10, 2020 - Plenary Roads Denver and construction partners completed a planned 20-week construction project on US 36 in less than 6 weeks.

DENVER — Plenary Roads Denver (PRD), in collaboration with the Colorado Department of Transportation (CDOT) and the High Performance Transportation Enterprise (HPTE), completed a US 36 pavement rehabilitation project between April and May over a duration of 39 days.

The panel replacement project, eastbound and westbound between Pecos Street and Federal Boulevard, was expected to take 150 days. Due to lower traffic counts as a result of the COVID-19 pandemic, PRD and its construction partner Hamon Infrastructure were able to increase roadway access and dramatically accelerate the construction schedule.

CDOT and HPTE worked closely with the PRD team to optimize access to the roadway during this period of decreased traffic. PRD and its partners understand that construction along the corridor can create frustration for commuters and project managers were able to minimize the impact with a much quicker delivery time.

About Plenary Roads Denver:

Plenary Roads Denver (PRD) is a Denver-based consortium of industry-leading firms established to efficiently deliver improvements to the US 36 corridor. By creating a team of experts from each part of the infrastructure industry, PRD is able to ensure an integrated roadway, bus rapid transit system and bikeway that serve the needs of all residents. PRD is led by Plenary Group, a long-term investor, developer and operator of public infrastructure projects in the United States and Canada. Plenary's U.S. headquarters is in Los Angeles. It has additional offices in Denver and Tampa, Fla. For more information, visit PlenaryRoadsDenver.com.
